RAIL KING

Mobile Rail Car Movers

Sales, Service, Parts & Rental

Stewart & Stevenson's RAIL KING Mobile Rail Car Movers are in stock and available for sale or lease to handle all rail car movement needs.

Rail King mobile rail car movers increase productivity in railcar switching operations for warehousing companies, chemical and refining plants, cement facilities, mining, steel piping and grain and feed operations — any facility that needs loaded rail cars moved to the rail yard and onto the tracks. With both road and rail wheels and 360-degree visibility, Rail King easily, efficiently and safely accomplishes the task.

All Rail King models are available in single-coupled and double-coupled models, providing tractive effort ratings from 28,250 – 33,000 pounds (single-coupled) and 44,500 – 49,250 pounds (double-coupled). All models feature Royalglide suspension system, patented cushion coupler system, simplified power train and simplified hydraulic system. The full width cab G5 models introduced in 2011 added a Tier 4i low emissions engine and a PLC based electrical control system.

Whether purchased or leased, Stewart & Stevenson offers service and maintenance, with OEM parts, on all Rail King models.
